

Description

Matière :

Acier ou Inox (A 2).

Finition :

Classe de résistance 12.9, naturel. Diamètre ajusté rectifié.

Acier inoxydable naturel ou acier bruni.

Nota :

Les vis rectifiées à épaulement offrent plus de possibilités que les vis habituelles. Elles servent d'éléments de construction pour des applications multiples. Elles représentent souvent une solution économique en simplifiant la conception et créant un effet de rationalisation déterminant.
